GFB **Industrial Tough** bits are manufactured with a unique process whereby the steel is tempered twice under high intensity heat, which makes the bits stronger and last longer. GFB driver bits undergo a **more vigorous testing** as opposed to other brands – more numerous spot checks means better quality control. GFB screwdriver bits are manufactured to the highest specifications as required by top-line industries such as **Aviation, Solar Fitting and Security**.

- Industrial Tough
- Unique Tempering Process
- Lasts longer
- Manufactured to the highest specifications
- Used in Top-Line Industries

Testing 'Industrial Tough'

GFB Torque Testing against Competitor Brands

GFB drill bits are regularly tested against competitor products. GFB use a Torqueleader testing kit which measures the level of torque (in newton meters) at which a drill bit fails. In our tests, GFB typically outperforms the two closest competitor products.

Note that this was not conducted in laboratory conditions – it is an internal testing procedure.

**IMPACT
FORCE**

Products labelled as **BP** are available as individual bulk barcoded packaging

GFB

Nutsetters

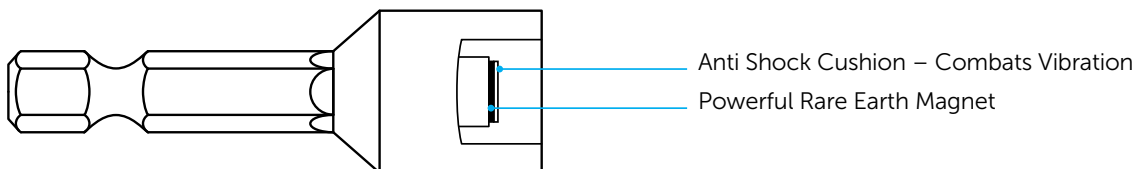

GFB Industrial Tough nutsetters are specifically designed & manufactured to Australian conditions. Rare earth magnets have been used, which means that they are stronger and last longer than standard magnets. GFB nutsetters have a registered design incorporating an anti shock cushion to combat vibration and preserve the integrity of the magnet.

- Manufactured to the highest specifications
- High Tensile Steel
- Varied Size Range
- Industrial Tough
